## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 14 February 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of the following informalities: the claims must be preceded by the sentence "I (or we) claim" or "The invention claim is" or equivalent.

Appropriate correction is required.

### ***Claim Objections***

2. Claims 1-20 are objected to because of the following informalities: the claims must be thoroughly checked for antecedence basis, e.g. "a slot" in claim 1 is in line 1 and line 2, " a selected circuit board" of claim 15 is already claimed in claim 14, therefore all articles must be placed properly to be grammatically correct.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 21 is vague and indefinite because it is misdescriptive and grammatically incorrect.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-7, 8-12, 13, 17-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grouell et al.

Grouell discloses the digital processor chassis comprising a card cage 21 with coverings having airflow inlets and outlets and fan assembly to produce airflow, the chassis having slots to dispose slidable components 41, airflow apertures 27 are disposed adjacent the slots for entering and exiting airflow either from one edge of the slidable component or from the opposite edge, the slidable components are shaped similar and present the same impedance to airflow. Grouell et al disclose the claimed invention but shows disk drives as slidable components instead circuit boards and does not specify method of making such as brazing, It would have been obvious at the time the invention was made to a person having ordinary skill in the art to use the chassis for the circuit boards as shown in many of prior art references of record and it is obvious that in this case the presence of process limitations in the article claims which limitations do not otherwise distinguish the current article from the prior art cannot impart patentability to that product.

7. Claims 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grouell et al. in view of Melville et al.

Art Unit: 2835

Grouell discloses the claimed invention except a circuit board comprising a plenum.

Melville discloses the circuit board 44 comprising a substrate and components mounted on the substrate, the circuit board is slidable into slots of the card cage and includes a cover 34, 50 comprising a plenum for airflow. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to use the circuit board as disclosed by Melville et al. in the device disclosed by Grouell et al. for efficient heat dissipation.
